

Lone Star Canterbury Rally 2015

Stage Descriptions

Special Stage 1 (night)

This stage has a wee bit of everything. Many of the same roads as were used in 2013 except for the last 2kms.

Special Stage 2 (night)

This stage is part of other stages used in 2013; it uses the boundary of the forest, then back into the heart of the forest with the amazing Mt Grey Road and then finish coming down the start of the rally sprint road.

Special Stage 3 and 7

This is a small stage that works its way up Horseford Downs Rd. The forestry have spent a lot of money on this road which is why we have to stop it early. A great wee sprint stage!

Special Stage 4 and 8

This stage has been done in 2014 but it starts further up from the previous stage. Very fast and tight flowing; a challenging stage with a great fast few km's to finish.

Special Stage 5 and 9

Demmocks Rd top to bottom – what can I say... If you don't like this stage, rallying is not the sport for you. Great piece of road!

Special Stage 6

This stage comprises of SS1 and SS2 joined together from the night stage before. You get to see the corners that scared you in the dark, in the daylight. Great stage, great length and there is nothing wrong with length... finishing down the down of the rally sprint.

Special Stage 10: (Power Stage)

This is the super stage using all of the famous Mt Grey Road you have already been on. This is one of the best forest stages you can do. Also finishing down the down of the rally sprint road.
